

Master Report V1.2

Master Report is a utility to convert raw data files generated by S-200 series spectrophotometer to Excel spread sheet report. Make sure Microsoft Excel is installed before use the utility.

Click on “Browse” button to open file browse window.

Browse to the target folder containing the raw data file.

Select the right file extension and pick the file to convert. File path will show up in the text box.

Click on “Convert” button to finish the conversion.

Save the converted file and click on “Exit” to close the program.
